

Event Features

- [Stream Chat](#)
- [Assign a Video Wall](#)
- [Assign Front Row Device](#)
- [Automated Actions](#)

Stream Chat

1. The stream chat is an optional feature. Click the gear icon to to customize settings.

2. Adjust Stream Chat settings. Activate or Deactivate chat, adjust message interval & enable a profanity filter .

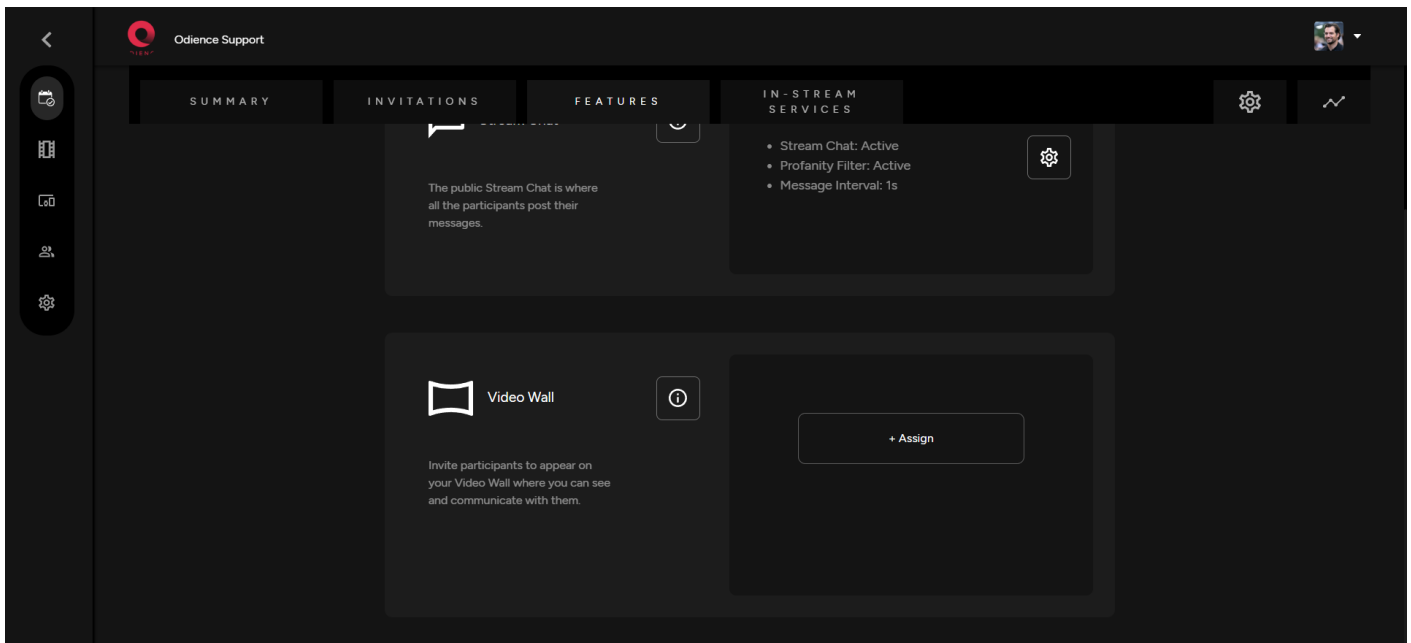

3. Click save to apply changes to your Stream Chat.

Assign a Video Wall

What is a Video Wall?

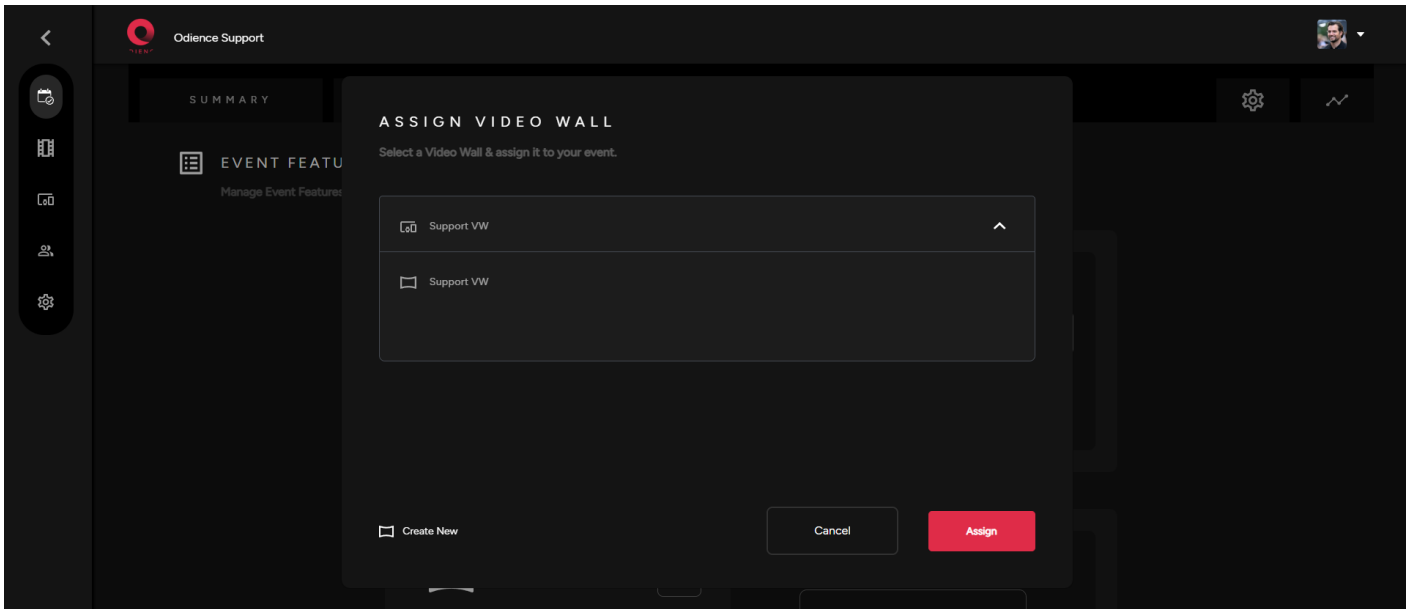

- Video Walls elevate your event by allowing you to display products and communicate with event participants.

- Click the "i" icon to see get a glimpse of what you can achieve with Odience Video Walls.

Assign a Video Wall

- Create or assign an existing video by selecting one from the options in your dropdown. Click Assign and you are good to go.

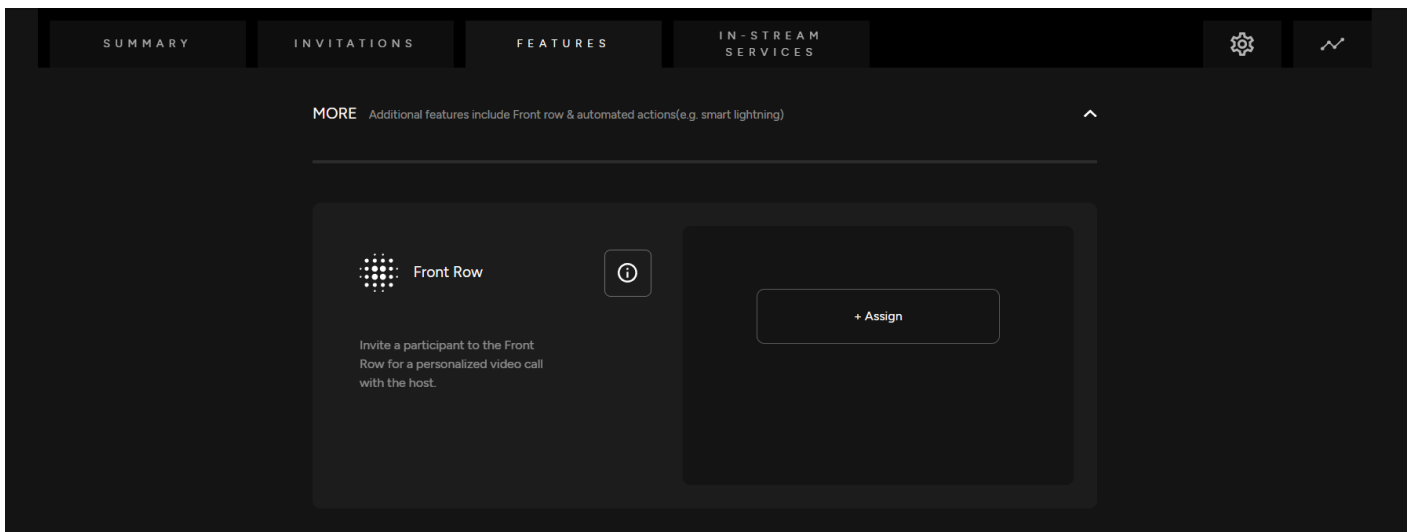

- To create your very own custom Video Wall, click here to see our [Create Video Wall](#) guide.

Assign Front Row Device

Front Row allows a lucky viewer to get closer to the event via a 1 on 1 video call with the host, artist, etc.

Assign Front Row Device

Assign a Front Row device. You can enable or disable this feature. If there is not a Front Row device created, you will need to first create one.

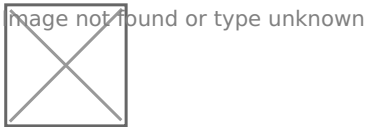

- For more information, see our guide on how to [Create a Front Row Device](#).

Automated Actions

Actions (Need more info on how to use/configure)

-Create actions which are automatically triggered by certain events. The specific event/action will have to be programmed in the edit section of the actions section.

- The main part of the editing panel will be setting up the actions trigger than initiating a command.
